

HALA TUJU KEMENTERIAN PERMODENAN PERTANIAN SARAWAK

Vision

Leading the transformation of agriculture to achieve high income economy.

Mission

We commercialize and modernize the rural agriculture to improve household income.

Strategic Directions of MOMA

Increasing farmers' income and food security through transformation and modernisation of agriculture.

Modernisation Efforts

- Adoption of latest (appropriate) technology (closed house farming for poultry and pig, fertigation system for vegetables, net house for vegetables production);
- Market driven farming– Linking production with market (Cavendish banana production);
- Integrated supply chain (Pig Farming Area);
- Adoption of good agriculture practices (MyGAP);
- Large scale agriculture production (Rubber mini estate, Permanent Food Production Parks, Aquaculture) ;
- Private sector's participation - Guangken Group involved in management of rubber mini estate, rubber processing (Sri Aman and Betong Divisions) and R&D (Sg. Sebiew, Bintulu).

Transformation Efforts

- Agriculture NKEA
 - EPP 11: Scaling Up and Strengthening of Paddy Farming in other Irrigated Areas (Batang Lupar & Bario Paddy Projects),
 - EPP 5: Cattle Integration in Oil Palm Estates,
 - EPP 4: Integrated Cage Farming,
 - EPP 2: Edible Bird Nest and Swiftlet Farming.
- NKEA Oil Palm and Rubber (Smallholders).

Leading the transformation
of agriculture to achieve high income economy

We commercialize and modernize
the rural agriculture to improve household income

Two Main Strategic Objectives

Improved food security

Improved farmers' income

Key Focus Areas

Increasing food production, productivity,
quality and safety

Accelerating the new planting and
replanting of high value crops

Operational Objectives and Targets

Rice: SSL increase from 53% to 70% by
year 2020

Fish: 110.4% by 2020

Beef: 32.7%; **Mutton:** 30.9%;

Poultry: 131.6%;

Pork: 93% by 2020

Vegetables: 67.6% by 2020

Fruits: 76.3% by 2020

Increase of farm income of not less than
RM3,000 per month by year 2020

- Planting of high yielding rubber with
project size of 4 hectares per
household

- Planting of oil palm with project size of
4 hectares per household

Paddy: Batang Lupar Granary and Bario
under NKEA – EPP 11, Paloh, Sg.Seblak,
other selected DID Schemes and
existing paddy areas

Fish: Aquaculture Industrial Zone (AIZ) –
Batang Ai HEP, Tagang System,
Empurau and Terubok Research

Livestock: Pig Farming Area, Goat
Farming and EBN

Vegetables & Fruits: TKPM

Physical target:

Rubber – 350,000 hectares by year 2020

Oil Palm – 70,000 hectares by year 2020

Roles and Functions

1. To formulate policies and development programmes that will enable agric-food industry to be globally competitive, modern and sustainable.
2. To monitor and evaluate the implementation of policies and programs carried out by the agencies under its purview.
3. To review and modify the policies and programmes when necessary.
4. To formulate and review the existing legislation with the view to enhance conducive agricultural development.
5. To initiate or undertake research for the purpose of (1), (2), (3) and (4) if necessary.
6. To exercise partnership with other agriculture agencies so that they their programs and activities are in harmony with the Ministry's policies.
7. To facilitate the private sector participation in agriculture development.

Strategic Focus of 10MP

10MP Programmes and Projects are inline with MOMA's Vision and Mission.

- Dasar Agromakanan Negara (DAN) 2011-2020 – Food Security (sufficient food & safe), Increase Farmer's Income Level and Increasing Agro Food Competitiveness
- Dasar Komoditi Negara (DKN) 2011-2020 - NKEA Oil Palm & Rubber.
- NKEA Agriculture – EPP11 (Btg Lumar & Bario Paddy Projects), EPP4 (Aquaculture – Btg Ai), EPP2 (Edible Bird Nest) & EPP5 (Cattle Integration with Oil Palm).
- NKEA – Smallholder Oil Palm & Rubber (increasing contribution of agriculture sector).
- NKRA Projects – Bumiputera Lab & 1AZAM.
